DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, drawn to an adaptive control means for adding to the offset vector a compensation vector updated according to the adaptive algorithm minimizing the expected value of the product of the inner product and the updated derivative vector (increment/deviation vector) in an offset compensation device.

Group II, claim(s) 23, drawn to an intermittent control means for intermittently supplying a modulated wave in an offset compensation device.

Group III, claim(s) 24-28, drawn to a local frequency control unit for setting a frequency of the local frequency signal for frequency conversion at a predetermined value F and to a value different from the predetermined F in an offset compensation device.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: While each of the groups relates to offset compensation devices, each group is drawn to different inventive concepts in which the compensation control mechanisms are implemented in different device structures, as outlined above in the description of each of the groups. Group I relates to minimizing an expected value, Group II relates to intermittently supplying a modulated wave, and Group III relates to setting a predetermined local frequency signal.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
